Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Response to Amendment***

1. This communication is in response to applicant's amendment filed April 15, 2004. The proposed amendment to the claims has been entered. Claims 1-21 are pending.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1-21 are rejected under 35 U.S.C. 102(a) as being anticipated by Crowther, J et al (EP 1,113,656). Hereinafter, referred to as Crowther.

With respect to claims 1-2, 7-8, 13-14, and 17-18, Crowther discloses in Figs. 6-8, the queuing mechanism of the multimedia queuing manager for queuing incoming messages (storing the communications transmissions according to the classification category assigned thereto) via the packet data network as shown in Fig. 5. Crowther discloses (col. 5, lines 54-57 and Fig. 2) that the pending requests queue 215 contains the pending requests at particular priority levels that are waiting to be answered by agents.

Herein, the pending requests queue 215 as illustrated in Fig. 2 is considered as a classified queue for one customer by the examiner and containing multiple pending requests such as voice calls, e-mails, web forms, etc...(establishing classification categories for a user and a variety of communications transmissions effected via a packet data network).

As shown in Figs. 6-8, incoming messages are prioritized in the pending queues (establishing priority sequencing guidelines for the classification categories). Crowther discloses in Fig. 5, messages received at the network interface 122 from the customer 260 via the network cloud 172 (receiving at least one communication transmission via the packet data network). Crowther discloses in Fig. 6 that an incoming email is queued in SalesEmail pending queue (assigning a classification category to the communications transmission).

With respect to claims 3-4, 9-10, 15, and 19, Crowther discloses in Figs. 6-8 that an email is presented to the agent (selecting and presenting one of the stored communications transmissions for presentation to a user).

With respect to claims 5, 11, 16, and 20, Crowther discloses in Fig. 4, once the call arrives at the PBX 120, the media gateway routes and connects the call to an agent (generating a signal to alert a user of the receipt of a communication).

With respect to claims 6, 12, and 21, Crowther discloses in Figs. 6-8, signals are generated to alert the agents of the incoming messages, wherein such messages are to be processed according to its priority (generating a separate signal for each classification category or user defined amalgamation of classification categories to alert a user of the receipt of a communication belonging to each said category or belonging to the user defined amalgamation of various classification categories).

***Response to Arguments***

3. Applicant's arguments with respect to claims 1-21 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

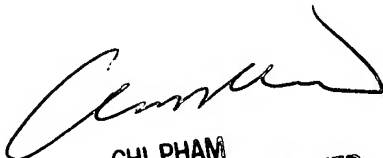

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anh-Vu H Ly whose telephone number is 703-306-5675. The examiner can normally be reached on Monday-Friday 7:00am - 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chi Pham can be reached on 703-305-4378. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
